

InCar™ Camera Mount

Designed and engineered for racing, the patented CruiseCam™ InCar™ Camera Mount is now for everyone!

An exclusive
CruiseCam™
product

Hands-free video from your car!

CruiseCam's InCar Headrest Camera Mount is an automotive camera mount designed for mobile video recording. The mount clamps inside the vehicle, to the passenger seat headrest, allowing hands-free filming from the driver's viewpoint. Lightweight and portable, the InCar Headrest Camera Mount installs easily in minutes without the use of tools. The InCar Headrest Camera Mount was developed for professional racing applications prior to being adapted for recreational use.

Your video will have the same look experienced by the driver's vision, a result of the mount's rigidity and clamping system that effectively joins the mount to the seating system. Tested and used in racecars and police vehicles, the InCar Headrest Camera Mount keeps the camera steady while recording. Once reserved for professional applications, this patented CruiseCam technology is now available to consumers.
