

**Nearly 5000 cars are stolen every day.**

Will your car be next?

Sad to say, chances of your car being stolen are greater than you think. Because vehicle theft trends indicate that more than 2 million cars will be stolen in the U.S. this year.

You may or may not love your car. But, in either case, you should protect yourself from the anxiety, frustration, and inconvenience that occurs when your car is stolen. Not to mention the insurance hassles. Or, feeling that you've been violated.

**Extra protection with or without a car alarm.**

The Hand Brake Lock is extra protection that can help prevent your car from being stolen. If you have a car alarm, The Hand Brake Lock is an additional deterrent. If you don't have a car alarm, it can save you the expense of putting one in.

**The Hand Brake Lock™ can prevent theft.**

This ingenious invention is such a simple solution, it's surprising it hasn't been offered before. The Hand Brake Lock lets you lock

your vehicle's rear brakes—simply by engaging your hand brake and locking it with a twist of your fingers. So your car can't be driven off unless you want it to.

In addition, The Hand Brake Lock can also prevent children from accident and injury by preventing your car from rolling down a hill or driveway if children play inside the car.

**Here's how it works.**

When you install The Hand Brake Lock on your car's lever-style hand brake, it lets you easily rotate a factory pre-set, 3-combination number to lock and unlock your hand brake at your command. So even if a thief gets inside your vehicle, he can't release the hand brake to drive it away.

**Easily installed on almost every vehicle with a hand brake.**

This ergonomically designed, European engineered lock is easily installed on most hand-brake levers. Easy to follow instructions are included so you can install it in just minutes.

Once properly positioned on the brake lever, the lock is permanent—and ready to provide rear brake lock protection whenever you set it.

**Approved by the German Technical Inspection Board. Money-back guarantee.**

Made of high-alloy, non-rusting, die-cast aluminum, and upholstered in soft, black leather-grain vinyl, The Hand Brake Lock improves your car's appearance because it looks better than the original equipment. To further assure you of quality, it has been tested and approved by the prestigious German Technical Inspection Board, TÜV. And, is

Two metal tags with your combination number are included.

backed by Euromotive's 30-day return policy (prior to installation). Plus, a one year limited warranty against defects.

**Protect your car now.**
